

⋮ Xtra Enzymes

XCAP Model Number: XCP-2029

Promotes health in muscles, joints, circulatory, and immune system.

These enteric coated enzymes work 'systemically' because they are absorbed intact into the small intestine and transported through the blood stream degrading inflammatory mediators (proteins) that contribute to joint pain and soft tissue inflammation

⋮ Xtreme Protein

XCAP Model Number: XCP-2104

Builds muscle by stimulating maximum protein synthesis.

Fast acting Ultra Low Temperature, Micro-Filtered, Xtreme Protein contains 12 times more GMP than ion exchanged Whey Protein isolates. This process allows us to provide undenatured protein with a full balance of bioactive whey protein fractions.

⋮ 4Ever Greens

XCAP Model Number: XCP-2074

Helps block inflammation and antioxidants

4Ever Greens incorporate high amounts of antioxidants, and add a considerable increase to the number of daily servings of fruits and vegetables.

Green drinks have been accredited to having an alkalizing effect on the body.

⋮ B12 Nitro

XCAP Model Number: XCP-2043

Important energy booster.

The intestinal absorption of Vitamin B12 is more complex than the other B vitamins, involving acidic cleavage from Vitamin B12 carriers, binding proteins and intrinsic factor mediated intestinal absorption.

⋮ Is This For You

After you put in the time and effort for a great workout your body needs a fast acting recovery program.

Our Recovery Shake combined along with our Xtra EnZymes to reduce inflammation, gives you exactly what is needed for fast muscle recovery, energy production and stamina.

⋮ Benefits

- Supports recovery before, during & after exercise
- Assist in decreasing inflammation
- Increase or maintain muscle mass whether cutting or bulking
- Helps you train longer & harder

⋮ Take The Test

- Recovery Shake (Blend) - After Practice
 - 4Ever Greens - 1 scoop
 - Xtreme Protein (Whey Isolate) - 2 scoops
 - Banana - 1
 - 20 oz. of ice water
- Take B12 Nitro - 1 per day
- Take Xtra Enzymes – 4 to 8 tablets on empty stomach 1 hour to 30 minutes before practice starts, then 4 to 8 tablets with 10 ounces of water immediately after practice
